jobs
fair

at Halliwell Jones
Stadium, Warrington

Friday 8th February 2013 10am-4pm

Welcome to
Warrington's
Jobs Fair.

During this difficult time for the economy, I am acutely aware of the problems faced by many of the people in Warrington who are in low income jobs or who are jobseekers. Since 2009, I have been running a Jobs Club and so far 150 people have been helped back into employment or education.

Please enquire at the David Mowat stand if you are interested in information about my Jobs Club.

The natural progression for job seekers is to have an opportunity to meet employers in the area. To find out about companies that

they would not normally look at as potential employers and these introductions could provide the opportunity needed for those in need of work.

**FREE
ADMISSION**

This is a fantastic opportunity for employers to meet talented, local people looking for jobs. There are jobs in Warrington and there are talented people here who would like them. So today we are putting the people together with the companies and urging everyone to meet and find out what opportunities are really out there.

I would like to thank Warrington Worldwide for their generous support and the Job Centre Plus for their valuable support and involvement.

Advanced Apprenticeship in design

At Sellafield Ltd we are applying our vast experience and expertise to safely carry out decommissioning, reprocessing, nuclear waste management and fuel manufacturing activities at the Sellafield nuclear site.

These activities are supported by our engineering capability which is largely based at our offices in Risley, Warrington. At Risley we provide the engineering capability to support Sellafield Ltd's ambitions

The scheme develops electrical, mechanical and civil/structural design technicians through an Advanced Apprenticeship, and is fully accredited by the Institution of Engineering and Technology and the Institution of Mechanical Engineers.

We require bright, articulate and enthusiastic people to join our design teams. You'll be trained in all aspects of design and will follow an engineering apprenticeship route. A job is not guaranteed upon the completion of the apprenticeship but it is an excellent opportunity to get paid while receiving great career development.

To apply for this role, you will require a minimum of 5 GCSEs – 4 at grade C or above including English and a science subject, plus a minimum grade B in Mathematics. This apprenticeship is recognised by the Government as continued education under their RPA regulation
